Air Pollution Control Officer
Puget Sound Air Pollution Control Agency
P. O. Box 9863
Seattle, Washington 98109

SUBJECT: Lone Star - Coal Stock Piling
Notice of Construction No. 2399

Dear Mr. Dammkoehler:

We have received your letter dated January 3rd outlining our requirements and responsibilities in order for your agency to continue processing Notice of Construction No. 2399. This letter will confirm today's conversation our Mr. Ken Rone had with Mr. Brent Carson regarding our intentions:

1. A check in the amount of \$100.00 is enclosed to cover the offset review fee as provided for in Section 6.04.
2. In order to control fugitive dust from sources 3A and 3B (road to storage and road to receiving hopper), we will use a vanillin waste material to spray on the roads. For sources 4 and 5 (pile maintenance and active storage pile), these two areas will be sprayed once a week with a lignin. As conditions dictate, the areas would be sprayed with water as needed to control fugitive dust. We feel these measures would give better than 50% control efficiency.
3. This is your authorization to use the banked emission reduction credits (ERC No. 92) as offsets for the new source.

We at Lone Star appreciate the cooperation your agency has given us in handling this matter.

Yours truly,

Tommy G. Wells
Plant Manager
